

SELF-FUNDING SUCCESS STORY

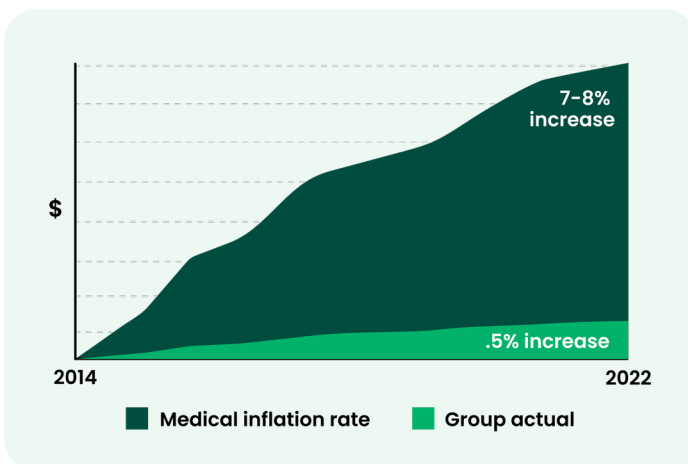

How a large professional services group improved employee benefits while reducing plan costs

Our Client

A group of medical practices, independently owned and led by its physicians, with operating divisions representing several areas of expertise.

Self-Funding Success

Working with HealthEZ, this healthcare group was able to increase access to quality care options while reducing costs by 12% PEPM (per employee per month) over three years without increasing employee premiums. One of the group’s board members and physicians attributes the plan’s success to four components: plan design, a high value network, employee education, and innovative sites of service.

1,500+
employees

12%
overall savings

“While our total plan costs have decreased, our employees have received improved healthcare benefits with flat premium contributions for the last 5 years.” - CEO

Self-funding is a powerful strategy to offer employees high quality benefits while reducing overall costs.

Customization at it's finest

HealthEZ's unique ability to customize plans from the ground-up gave this client the opportunity to use their own medical practices as a foundation for the group's health plan. Employees and their family members have broad choices within their network, but their biggest cost savings comes from using their own facilities.

Via thoughtful plan design, customization and communication, the group has increased utilization at their own facilities, helped employees get the care that they need and **reduced plan costs by 12%**.

Self-funding is a powerful strategy to offer employees high quality benefits while reducing overall costs.

Self-funded plans that bend the cost curve.

 **That's why we're here.**
